Portable LPR / ALPR

Extreme Portability

Portable LPR Mobility Kits from Vigilant Solutions provide agencies with a way to rapidly deploy high-performance license plate recognition (LPR) for special events, tactical operations such as roadside checkpoints, and for use on unmarked vehicles and trailers. Available in several different configurations, Vigilant Mobility Kits have all of the features you need in a ruggedized offering for flexible and versatile operation.

Key Features

- Complete LPR system in ruggedized Pelican case with wheels and pull handle
- Secure and easy-to-use magnet mounts for LPR cameras
- Multi-network cellular 3G / 4G / LTE router and wi-fi hotspot & embedded GPS*
- Onboard Lithium Iron Phosphate batteries*
- Use with laptop or MDT, or standalone with optional integrated Intel® processor complete with HDMI monitor and keyboard*

VIGILANT SOLUTIONS

Protecting Officers,
Families and Communities

Portable LPR / ANPR Mobility Kit

Ruggedized components make up the Mobility Kit. The dual-lens camera is rated at NEMA-6 for use in virtually all conditions. The heavy-duty magnet mount provides an extremely secure way to mount the cameras without the use of tools. The Pelican case packaging keeps your cameras and all other components secure when not in use or when being transported.

Removable Control Pod* design gives you extreme versatility in how you deploy your Mobility Kit. Place in the trunk of an unmarked vehicle, use roadside at a checkpoint, use on a radar or VMS trailer, or place inside a traffic control cabinet for fixed camera deployments on street poles. The pod features everything needed for complete system operation. Use AC/DC power where available, or run for up to 12 hours using the onboard batteries. Use the integrated cellular router and wi-fi access point to communicate data back to LEARN®. The Vigilant Mobility Kit is easily deployed in less than 5 minutes.

System Components & Key Specifications

Mobility Kit

- Dimensions (WxDxH): 21¼" x 16¾" x 10"
- Weight: 45 lbs.

Vigilant User Interface on Existing Laptop / MDT *(optional)*

- Windows XP, Vista, Windows 7
- Day / Night Interface Selection
- Mobile Hit Hunter
- Wireless Communication to LEARN

**Certain features and all photos are of Vigilant's Advanced Mobility Kit. The Vigilant Mobility Kit is also available in a basic configuration for simple mobile deployments that do not require the pod design, integrated Intel processor with monitor/keyboard, and onboard batteries.*
